**Let There be Lumens:** With ever higher energy prices we all have to be responsible for reducing energy demand where possible. We should always turn lights off after use, but it is also possible to fit low watt lights with a brighter light output (lumens). We recently changed all the ceiling lights in the chapel to 10 w LED. The power to run all eight LEDs is practically the same as one filament bulb. At the same time the room is brighter than before. Many thanks to Linda & Norman.

**Readers please email any changes you make on the readers list.**

Please ensure that all notices reach me by midnight on Thursday.
